Ascom Telligence® The Patient Response System

Bringing together clinical information for
more responsive patient-centric care

The Patient Response System: Elevating nurse call for unsurpassed patient-centric care

Telligence from Ascom is the world's first Patient Response System. With Intelligence, caregivers now have relevant information at the point of care and throughout the care process. Built on the Ascom Healthcare Platform that collects information from multiple sources (the patient, medical devices, healthcare applications and other systems), Intelligence gives clinicians a more comprehensive view of the patient's status that goes well beyond traditional nurse call. As a result, caregivers are better informed when responding to patient requests.

Ascom Telligence and New TelliConnect Station

Ascom TelliConnect Station provides access to relevant information at the point of care, and access to Ascom applications like TaskMinder, Charting and MDI, so patient needs are handled promptly. This patient-centric solution makes the following possible:

Optimized Communication

Captures and shares information from multiple sources to enable faster response times, while empowering the patient to control their own environment

Automated Staff Check-In

Recognizes staff presence at the bedside and in clinical care areas, so caregivers can focus on their patients

Efficient Clinical Workflows

Enables the centralized creation, management and tracking of tasks, staff workflow improvements and monitoring as a way of increasing positive patient experiences

Scalable and Flexible Design

Allows a modular approach to adopting The Patient Response System and customized solutions for unique healthcare needs... all with a modern hardware design

Quick Charting

Streamlines documentation to enable faster EHR updates and more time with the patient, while also eliminating duplication

Medical Devices Integration

Accesses clinical information from third-party medical devices with instant pairing and wide compatibility to collect key decision-making insights

The Ascom Healthcare Platform solutions are designed to integrate, orchestrate and enable aligned end-to-end digital clinical information and workflows between systems, people and devices at virtually any point of care. Representing applications, services, devices and smartphones, the Platform and Ascom Telligence enable seamless access, sharing and tracking of information across clinical teams.

Quick Charting via Ascom TelliConnect Station

Nurse Rounding Recognition

In-Room Presence Automatic Capture

Patient Device Monitoring*

Four key ways Ascom Telligence bridges clinical gaps for more informed patient care

Ascom Telligence is a modular, scalable patient response system. It seamlessly integrates with your current devices and applications, and can easily be expanded over time to meet future requirements.

Ascom Telligence is flexible...offering everything from a standalone nurse-call system to fully integrated, end-to-end patient response solutions. Whatever you choose, each Ascom Telligence module provides a solid foundation for ongoing patient response improvements.

1. Get more value out of your information and investment

The system leverages the required nurse call infrastructure and enhances it with communication and documentation tools.

2. Obtain important details for informed decisions

Provides a portal to the patient record and other information to help clinicians make informed decisions.

3. Easy access to key clinical content

Digital information derived from applications, devices and systems is made accessible for faster visibility of patient needs.

4. Easy, precise documentation

Allows key information to be captured at the bedside for better information collection that translates into more efficient care.
